DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 16-22, drawn to rail welderheads, classified in class 104, subclass 15.
 - II. Claims 8-15, drawn to a method of flash butt welding of rails, classified in class 219, subclass 53.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatuses of Invention I can be used in a process materially different from that of Invention II. For example, the rail welderheads of Invention I can be used as clamping enclosures for thermite welding processes (joining rails by an exothermic reaction).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1725

If applicant elects Group I, applicant must additionally elect the following:

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

la. Claims 1-7, drawn to a rail welderhead having a shear die fully enclosed within a firebox.

lb. Claims 16-22, drawn to a flash butt welderhead having a rail pulling capacity for moving and stretching substantial lengths of rail.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. NOTE: This application is missing portions of claims 19 and 21, as well as the entire claim 20, although pages are consecutively numbered 16 and 17. Furthermore, pages 9 of 16 and 11 of 16 are missing from the original specification, likely due to an

error during USPTO electronic scanning of the application. The applicant is kindly requested to submit complete copies of all pending claims 1-22 and all pages of the original specification upon reply to this communication.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Kevin P. Kerns whose telephone number is (571) 272-1178. The examiner can normally be reached on Monday-Friday from 8:00am-5:00pm.
